SMARTBoard: Running SMARTBoard 10

Pushes for SMARTBoard version 10 are now available in all teacher windows. Follow the instructions below to run SMARTBoard 10.

1

Install SMARTBoard 10 and Connect a SMARTBoard*

- A) Login with your personal login.
- B) Double-click the **Remove SMARTBoard9** icon in your Novell-delivered applications (NAL) window. When asked to restart, select **Yes**.
- C) Login with your personal login.
- D) Double-click the **SmBd10Drivers** icon in your NAL window. When asked to restart, select **Yes**.
- E) The next time you log in, the program will find the SMARTBoard connected to the computer. SMARTBoard tools will now be available. If the SMARTBoard is not connected to the computer, you can connect it now.

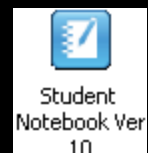

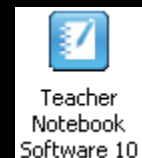

***NOTE:** This procedure has to be run only *once per computer* requiring SMARTBoard connectivity.

2

Activate the SMARTBoard 10 Notebook Software**

- A) Login with your personal login.
- B) Double-click the **Teacher Notebook Software 10** icon in your Novell-delivered applications (NAL) window. The Notebook software will load.
- C) Notebook software is also available from student logins. Once the students log in, they can run Notebook by double-clicking the **Student Notebook ver 10** icon in their NAL windows.

****NOTE:** This procedure must be run *every time the Notebook software is to be used*.
